

# ROOT CAUSE ANALYSIS REPORT

RCA-20260407-090614-i-00e04b

|           |                              |
|-----------|------------------------------|
| Triggered | 2026-04-07 09:06:14          |
| Resource  | test                         |
| Type      | ec2                          |
| Metric    | status_check_failed_instance |
| Value     | 1.0000                       |
| Severity  | CRITICAL                     |
| Cloud     | aws                          |
| Region    | eu-north-1                   |
| Generated | 2026-04-07 09:06:15          |

## Executive Summary

No clear upstream root cause was identified in the 30-minute lookback window. The anomaly on test/status\_check\_failed\_instance may be an originating event rather than a downstream effect.

### Analysis Confidence

## Root Cause Identification

No upstream root cause was identified within the lookback window. The trigger anomaly appears to be an originating event.

## Incident Timeline

| Time                |         |                                                        |
|---------------------|---------|--------------------------------------------------------|
| 2026-04-07 09:06:14 | Trigger | ANOMALY DETECTED: status_check_failed_instance on test |

## Recommended Actions

---

- 1. Acknowledge this anomaly in the dashboard once remediation is confirmed
